

# Conveyor Components

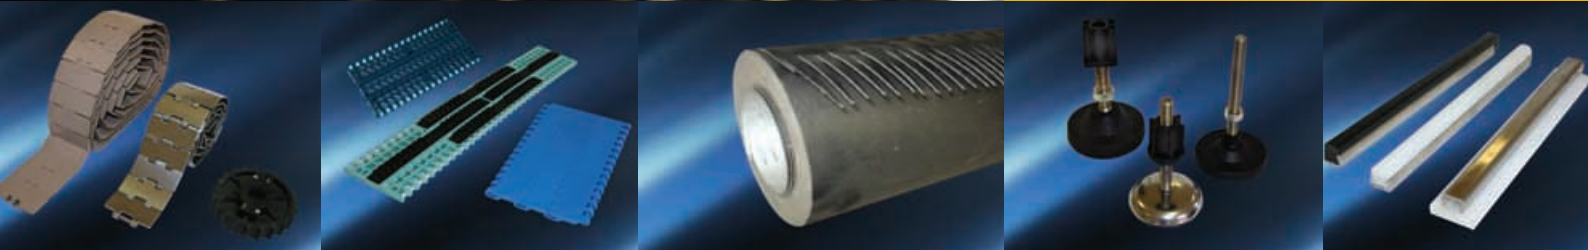

From stock we offer a comprehensive range of conveyor components that are used on many different types of conveyors.

Our products include all types of made to measure conveyor rollers in mild steel, stainless steel or plastic, guide rails, wearstrips and levelling feet.

We also supply all types of conveyor belts including PU, PVC, and Modular belts. A full installation service is also available if required.

Other components include slat chains, polyurethane drive belts, positive drive belts and specially coated timing belts.

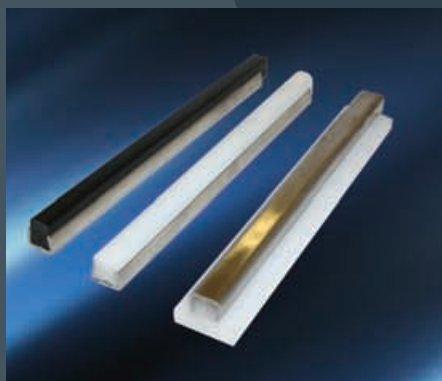

### Stainless Steel & Plastic Slat Chains

Typically used in bottling and canning operations we offer a full range of stainless steel and plastic slat chains. Products include straight running and side flexing chains, sprockets & idlers.

### Machinery Feet

We offer from stock a large range of levelling feet and inserts. Typically used for levelling items on uneven surfaces, adjustable feet can also be used to protect floor surfaces and allow access underneath equipment for cleaning purposes.

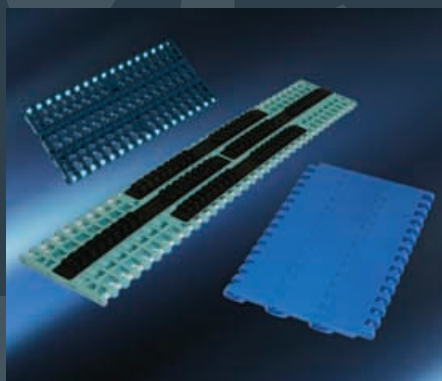

### Guide Rails & Wear Strips

Guide rails are used to control product direction while moving on conveyors. Wear strips are used to reduce friction between moving surfaces and are designed to be easily replaced when required. We offer a range of standard guide rails and wear strips as well as a machining service that includes made to measure items.

### PVC & PU Conveyor Belts

We provide a full range of PVC & PU belting that includes fitting when required. Our belts are widely used in food processing applications and on conveyors moving boxes and cartons etc.

### Modular Conveyor Belts

We provide a full range of modular belts that can be used in an endless variety of industrial applications. Modular belts can be supplied with open mesh or closed top and can also be fitted with profiles. Modular belts by their construction are very strong and durable and can be used to convey virtually anything.

We provide unique solutions to production line processes that save time and money.
